# In Fashion Now

Keeping cool and crisp looking on a hot summer day need not be as hard as it sounds. There are many new fabrics woven to let the air in, thus helping you to have your own cooling system. Check the texture of the materials used in your new summer clothes.

The sunback dress with the little cover-up jacket is as popular with the city woman as with the woman living in the cooler, rural sections. The dress without the jacket can be worn around the home and for informal occasions. Add the jacket for a quick trip to the market or into town.

Separates have long been the solution for many to the problem of having to extend a wardrobe on a limited budget. Combining fabrics makes for an interesting and personal look. Flower - printed cottons, pastel linens, cool rayon and cotton mixtures, organdy or silk can keep you in that cool, crisp condition. All these fabrics can be combined to make many different outfits.

Use a gay silk or cotton sash tie to bring together both skirt and blouse.

The fashion people say this is the most colorful summer they're ever known. Shoes of satin, linen and leather are being dyed to pick up a desired color in a bouquet printed silk or cotton dress.

The beautiful blue, yellow, green, pink, light brown, and lavender kid leather shoes seen on the market have made a big hit with the ladies.

Matching the color of your make-up to your outfit is getting more attention this summer than ever before.

Interne: Oh yes, we had a lot of patients admitted during the cold and snowy spell — all of them victims of congestion.

Reporter: Congestion of the lungs?

Interne: No; congestion of traffic.
